## SELECTION PROCEDURES

Selected candidates meet the requirement criteria of our clients. We evaluate their skill set to match the job description, and their ability and willingness towards the new job. We focus on adding valuable labor to the client's companies.

### TRADE TEST

Trade test will be evaluated and conducted by an engineer of the required trade with the help of a selection board at the technical training institute. If a client/company requires the employees to take an interview as well as practical test, the trade test will not be taken at the technical training institute, instead it will be conducted at company's premises under the supervision of the selection board.

### MEDICAL CHECK-UP

Selected candidates will be required to take physical tests for diagnosis of any ailments/ illness at an authorized hospital or clinic. Only those candidates who are declared fit by the medical institution after the test, will be eligible for foreign employment, and be offered to sign the employment contract.

## **DOCUMENT REQUIRED**

The below listed documents is required for employment of Nigeria citizens.

- Demand Letter
- Power of Attorney
- Agreement between Cea-Mola and Sponsor
- Employment Agreement
- Guarantee Letter

### **Employer/ Employee responsibilities:**

It is management's responsibility to ensure that all quality policy and quality objectives adopted have been made known to all employees, as the success of this policy involves all staff and sub-contractors being individually responsible for the quality of their work, resulting in a continually improving working environment for all. The director is responsible for the implementation of a management structure that is based on the experience, quality and commitment of its management team and have a specific responsibility for ensuring that the management structure reflects the quality standard, so that compliance with this Quality Policy is maintained and improved.

**Training:** In order to provide a quality service, Cea-Mola requires staff to be suitably trained, supervised and supported. In particular, the directors will support the following; •

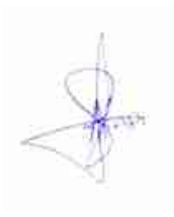

Each member of staff will have a personal development plan/portfolio in which their training needs are identified and a plan made as to how such needs will be met.

Each member of staff will be offered training to meet regulation and National Standards.

**Monitoring:** An important element of the improvement process is management follow-up. As such, the quality policy and management system are reviewed and updated regularly to take account of changing circumstances and client requirements.

This can be achieved by:

1. Establishing a timetable for management review meetings, to review progress and to give a clear signal to customers and staff that management is committed to improvement.
2. Ensuring that all the improvement tasks are reviewed regularly and relevant action is taken where necessary.
3. Help is given to resolve any problems that are being encountered in achieving any improvement

## **QUALITY ASSURANCE POLICY**

The management and all who work at Cea-Mola are committed to providing the highest possible level of service in satisfying the requirements of our customers, suppliers and sub-contractors alike. This level of service is achieved through quality management and the adoption of a system of procedures that reflect the competence of the Company to all business relationships. In order to ensure that Cea-mola achieve excellence in all its activities, Cea-Mola have implemented a formal quality management system, which satisfies the requirements of BS EN ISO 9001:2008

### **Objective:**

Cea-Mola's objectives which underpin the quality management system are:

- Working in partnership with customers, suppliers and sub-contractors to ensure that their needs are fully understood so that the right quality service is provided, within the specified time and in line with budget.
- To strive to achieve the principle of 'getting it right first time, every time.
- Providing a first-rate after sales service which offers customers advice and support when required.
- Actively seeking customer feedback to use as a format for continuous assessment and improvement.
- The training and development of employees to ensure that they are capable of undertaking the work required to achieve the highest level of customer satisfaction, in accordance with the company's (and external) Health and Safety, environmental and quality standards.
- Appropriate resources are provided in terms of facilities and relevant skills to fulfill client 'needs.
- Progress towards the quality objectives is monitored

**HEALTH SAFETY AND ENVIRONMENTAL POLICY**

This policy defines Cea-Mola 's absolute commitment to protecting the health and safety of all those who can either directly or indirectly be affected by its business activities and to minimizing any adverse effects to the environment.

**Scope**

This Policy applies to all Cea-Mola entities.

**Policy**

At no time will Cea-Mola compromise the health and safety of its employees or those engaged on our activities and will always seek business solutions that recognize and respect the environment. This is consistent with the principles set out in the global compact to which Cea-Mola subscribes.

Establishing sustainable solutions is an integral part of Cea-Mola's planning process and it will continue to work with its clients, contractors and suppliers to reduce waste and emissions, conserving natural resource through the development of environmentally friendly technologies.

Cea-Mola will ensure that appropriate arrangements are in place to protect the health of its employees and all those that are affected by its activities.

In areas it operates that may lack such controls, or have controls that do not realize Cea-Mola's internal standards, Cea-Mola will apply its own standards.

Cea-Mola will provide encouragement and Support to those with which it interacts to achieve these standards.

This is in line with Cea-Mola's commitment to continuous improvement and social responsibility

Promote a climate and focus into the organization that demands positive and proactive HSE responses from its employees or those engage on our activities. Every person has the right to stop the work if they consider that an HSE risk exists.

Utilize meaningful leading and lagging performance indicator to improve performance.

Maintain an effective HSE management system.

Consideration for the health and safety of its employee and those who may be affected by its business and the protection of the environment will remain an integral part of its business planning and decision making process
